

Migrating to Android™ is simpler than you think

Zebra devices come ready to ease the transition with All-Touch Terminal Emulation (TE). This powerful tool moves your existing TE apps from traditional green screens to a modern, touch-screen user interface. That means reduced training, bigger on-screen buttons, less risk of errors, faster workflows and an overall simplified process.

You're **four steps away** from a better work experience

Step 1: Migrate

Skip retraining workers

- Present existing telnet apps on Android
- Ease implementation
- Maintain industry standard protocols

Step 2: Optimize

Work at full speed

- Eliminate redundant tasks
- Automate processes
- Create contextual menus based on work
- Train workers in less time

Step 3: Modernize

Give your apps a user-friendly look and feel

- Expedite task and training speeds
- Highlight important on-screen data
- Minimize errors with visual cues
- Mix modernized and native screens

Step 4: Customize

Let Trek Associates build a solution around your processes

With a dedicated project management team and more than 35 years of designing Warehouse tech solutions, Trek Associates can create customized solutions around the way you work. Contact us today so we can start learning about your company, your processes, and your needs in order to customize an effective and productive mobility solution that will serve you now and well into the future.
